Experience

University of Texas at Austin

Aug 2025 – Aug 2026

UI/UX Designer, UT Sage

- Owned UX for UT Sage, an LLM-based AI tutoring platform serving 2,000+ users, and led its end-to-end redesign across web and mobile, defining interaction patterns for LLM-driven features.
- Built a 25+ component **Figma** design system from scratch, with **design tokens** mapped to **TailwindCSS** primitives and **WCAG 2.2** accessibility requirements.
- Specified components for 2 engineers building with **ShadCN** and **CursorAI**, and worked with them to debug implementations against the design system.
- Planned and ran mixed-methods research with students and faculty, and turned findings into product and design system updates.

Visa Inc.

May 2022 – Jun 2024

Associate Design Engineer, Design Systems

- Led architecture and front-end implementation of the Visa Product Design System React library (@visa/nova-react), rebuilding a legacy system into a composable library adopted by **20+ global product teams**.
- Hand-coded **40+ components and 10 hooks** from scratch in **React** and **TypeScript**, and set the library's bring-your-own-state pattern.
- Implemented components from **Figma** with pixel-perfect parity, and brought all components to full **WCAG 2.2** compliance with accessibility researchers.
- Contributed **Rollup** and **Webpack** build pipelines (CJS/ESM) with tree shaking, cutting bundle sizes by 80%.
- Wrote unit and integration tests for every component with **Jest** and **React Testing Library**, reaching >90% coverage.
- Wrote the library documentation, ran training sessions and office hours, and maintained legacy React and Angular components during migration, cutting onboarding time by 50% and bug resolution time by 30%.

MANN HUMMEL USA Inc.

Aug 2021 – May 2022

Frontend Engineer Intern

- Built a **React** and **TypeScript** web app on the **MS Graph API** for leadership to view and edit KPI charts, replacing a SharePoint dependency and improving team efficiency by 50%.
- Built **Power BI** dashboards for financial data monitoring that surfaced 1M+ invoice discrepancies.

Featured Projects

UT Sage Faculty Evaluation Tool (Capstone)

Spring 2026

- Interviewed 4 faculty members to identify pain points around AI transparency and tutor configuration.
- Designed onboarding flows in **Figma** that explain how the AI tutor works to non-technical faculty.
- Translated AI evaluation frameworks into UX requirements, and designed interfaces in **Figma** that surface tutor performance issues.
- Used **Claude** to draft the testing script and prototype an early version of the dashboard.

Personal Portfolio (xiaoleiqin.com)

2024 – Now

- Designed and hand-built the initial components, then used **Cursor** to add micro-interactions, restructure the components into a design system, and clean up the codebase.
- Used **Codex** to generate a 3D starfield on **Canvas** and scroll-triggered SVG animation in **Framer Motion**.
- Managed the codebase in **Git** with versioned releases, and set up **GitHub Actions** CI/CD with lint and build gates.

Education

University of Texas at Austin

Aug 2024 – May 2026

M.S. Information Studies, HCI and UX Design

GPA: 3.94/4.0

North Carolina State University

Aug 2017 – May 2021

B.S. Computer Science, Minor in Art and Design

GPA: 3.44/4.0 (Dean's List)

Skills

Design & UX Design Systems, Interaction Design, User Research, Usability Testing, Heuristic Evaluation, Accessibility (WCAG 2.2)

Languages TypeScript, JavaScript, HTML/CSS, Python, Java, C#, C++, SQL

Engineering React, Next.js, Angular, Astro, TailwindCSS, ShadCN, Framer Motion, Node.js, Django, REST APIs, PostgreSQL, AWS

Build & Testing Vite, Webpack, Rollup, NPM, GitHub Actions, Jenkins, Jest, React Testing Library, Accessibility Insights

Tools Figma, FigJam, Framer, Adobe After Effects, Illustrator, Photoshop, Miro, Claude Code, Cursor, Codex
